DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3 and 11 of copending Application No. 09/904001. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Claims 1 and 5: claim 11 of '001 discloses a transmitter such as that in present claim 1; using the transmitter in a UE or BS would have been an obvious step given that the transmitter is for transmitting user data, and further the compensation portion would not have changed the patentability with regards to the application of claim 11 of >001. Note that claim 3 of '001 corresponds to instant claims 3 and 7 for the same reasons. Claim 5 of '001 corresponds to instant claims 2 and 6, and claim 13 of >001 corresponds to instant claims 4 and 8.

Art Unit: 2682

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments filed 5-4-04 have been fully considered but they are not persuasive.

The Examiner upholds the rejection under the judicially-created doctrine of Double Patenting above. Regarding the related application 09/904,001, said application is examined by another examiner; the instant examiner has not been able to view the related application, and as such is unaware if a Double Patenting rejection or terminal disclaimer is of record on the related application. Given that a terminal disclaimer must be filed in at least one of the two applications, the examiner hereby upholds the Double Patenting rejection above and asks that a Terminal Disclaimer be timely filed to overcome said rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2682

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
